

1. Ask your pediatrician about the new Hummingbird™ TTS – tell them a little bird told you.

Other questions for my pediatrician about my child's ears:

Have you heard about this new conscious sedation option? Should I consider that for my child?

2. A Note from Preceptis Medical: For Your Pediatrician

The Hummingbird™ TTS Tympanostomy Tube System enables ENT surgeons with a conscious (moderate) sedation option to general anesthesia, for ear tube placement surgery for children.

To learn more or to find a Hummingbird ENT referral in your area,
go to: www.preceptismedical.com/parents

OR . . . to schedule a Hummingbird TTS presentation at your clinic, call Carla: 952-250-3275
